AZEK Building Products Introduces AZEK® Rail

Scranton, PA-- AZEK Building Products introduces AZEK Rail to complement its family of premium, low maintenance exterior building products. AZEK Rail offers the beauty and feel of real wood coupled with the high durability and low maintenance you expect from AZEK. AZEK Rail is available in three styles so there is an option for any lifestyle.

- AZEK Premier Railing, the classic Victorian railing, is available in white and six popular colors – including three options that complement AZEK Deck.
- AZEK Trademark Railing, a Colonial look that works well with any housing style, is available in white.
- AZEK Reserve Railing, a generously sized railing that offers a luxurious look and feel, is available in white.

AZEK Rail components are co-extruded with an encapsulated wood-composite core and a high grade capstock. Available in kits of 6' or 8' lengths, AZEK Rail features universal hardware, easy to install pieces, and pre-drilled pilot holes. With the subtle texture of painted wood, the railings have the quality assurance of an ICC code listing (ESR-1481). AZEK Rail's superior strength is derived from using patented Strandex technology. This enables AZEK Rail to not only meet code requirements, but exhibit guardrail strength and carry the highest load rating in the industry.

“We are thrilled with the addition of AZEK Rail to our family of products as it achieves our mission of providing premium, low maintenance building products to the market,” says Ralph Bruno, President of AZEK Building Products. “In manufacturing AZEK Rail, safety is our foremost concern and AZEK Rail meets or exceeds strict structural requirements. Therefore, as our strong and well-established distribution and dealer networks bring AZEK Rail to markets across the country, we look forward to continued growth and leadership of the AZEK brand.”

The AZEK Rail product line also includes replacement kits with handrails, bottom rails and balusters as extra pieces for jobsite needs or to allow the mixing and matching of colors within the railing system, which is a new trend in railing design. There is also a glass panel option (not covered within the code listing). For added architectural detail, decorative post caps and skirts may be purchased separately.

AZEK Rail joins the AZEK family of premium low maintenance exterior products including:

- AZEK Trim, the #1 brand of trim
- AZEK Deck, the #1 brand of Stain-Resistant decking
- AZEK Porch, the look of a traditional porch floor without the maintenance
- AZEK Mouldings, profiles that match the look and feel of AZEK trim.

Fueled by forward thinking, AZEK Building Products remains committed to quality, capacity and branded leadership. AZEK premium, exterior products are available at more than 2,000 dealers in North America. For more information, call 1-877-ASK-AZEK (275-2935) or visit www.azek.com.
