## **AZEK Building Products Adds New Adams Casing to Line of Low-Maintenance Mouldings**

AZEK Building Products, the leader in cellular pvc trim and mouldings, has expanded its AZEK Mouldings product line with the addition of the new Adams Casing profile. Casings are primarily used to cover the gap between the wall surface and a door or window frame, and are the most visible and defining parts of the trim. The Adams Casing is a universal profile for creating detailed shadow lines and adding character to any vintage window trim application. AZEK's Adams Casing is expected to be very well received in the marketplace. Jim Blahut, custom builder and owner of Perennial Homes in Beach Haven, NJ, prefers AZEK Mouldings, particularly for his historic restorations.

"Profiles like the new Adams Casing will enable me to maintain a consistency regarding the integrity of exterior trim applications," said Blahut. "In the past, the only way to achieve authentic trim details was to use painted wood profiles--a tough sell here along the New Jersey shore. Since AZEK launched their moldings I've been able to provide my customers with authentic, high quality decorative trimwork. When used in conjunction with their dimensional AZEK Trim products, I have been able to meet every challenge and deliver the high end results customers demand."

AZEK Mouldings include 16 profiles, replicating traditional moulding styles and sizes, including Crown, Rams Crown, Historic Sill, Base Cap, Back Band, Bed Mould, Brick Mould, Quarter Round and more. They are available in a white matte color that complements the look and feel of AZEK Trim. Selection and design is enhanced because the moulding products are one-for-one replacements of their wood counterparts. Other benefits of AZEK Mouldings include the elimination of milling costs and no need for painting (although they can be painted). Compatible trim and mouldings ensure a great looking job that will endure year after year.

AZEK products resist moisture and insects, and will not rot, warp or decay. AZEK Mouldings are beautifully crafted and ready to install, while traditional AZEK Trim products can be custom milled, routed, turned on a lathe, and heat-formed. For additional information about all AZEK products, call 1-877-ASK-AZEK (275-2935) or visit [www.azek.com](http://www.azek.com).

**Fueled by forward thinking, AZEK Building Products remains committed to quality, capacity and branded leadership. AZEK premium, exterior products are available at more than 2,000 dealers in North America. For more information, call 1-877-ASK-AZEK (275-2935) or visit [www.azek.com](http://www.azek.com).**
